STEP 7

- 13 

STEP 8

STEP 9

Press down the slats frame please use hands pressing on the points as the drawing showed. The bed has a pair of high pressure gas lift struts (75kgs each). After the bed frame is assembled, you will need to pull the metal frame down pretty hard, so that you can put slats on. After you add the mattress on the metal frame, the frame would be much easier to be closed down.
