User's Guide

1. To use this product, please plug it into a 12V DC power supply.
2. If there is no touch response suddenly, Re-plug the power to reset the touch static electricity.
3. If bubbles appear on the panel, remove the protective film.

Product Introduction

Smart box is powered by USB-A and Type-C, meeting the general charging needs of all phone models. Equipped with a built-in human body sensor, it can detect objects approaching within a range of 2 meters and achieve intelligent sensing to turn on lights. And with 24 colors light, music beat, fast and wireless charging function is 15W .

This touch button enables the switch of radar sensing function

A. touch this button once to turn on the radar sensing function (indicator light on).

After the person leaves or remains stationary for more than 30 seconds, the light strip goes out; people and objects within a range of 2 meters move will light up the light strip.

B. Long press this button for 0.5 seconds to turn off the human body sensing function (the indicator light goes out). At this point, Keep the light strip as it was before turning off and no longer be affected by human and object activities.

By default, radar sensing is enabled when powered on.

This touch button achieves functions such as light strip on /off, light color switching, and adjust the brightness of the light.

A. Touch this button can turn on or off the light (the indicator light will turn on or goes out)

B. With the circle of light, long press this button to achieve to adjust brightness of the light's function.

White light is enabled by default when powered on.

This touch button implements the function of a music rhythm light

Touch this button to turn the music jump light on or off (the light jumps with the sound)

This area is for wireless charging function, supports fast charging with a maximum power of 15W.

When charging, the product should be placed the center of the identification to maximize the charging efficiency. After powering on, the wireless charging function is enabled by default.

Type-C Output Port

USB-A Output Port

This area is the color switch function,

you can click or slide to any color circle position to achieve color switch.

The center hexagon of the color circle is marked as the dynamic phantom color mode which have 5 magic color modes.
