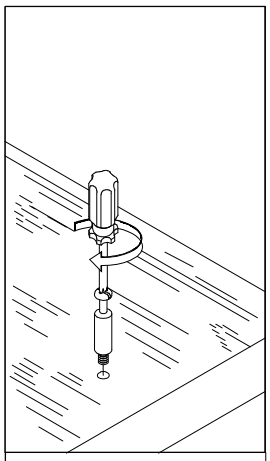
Using Camlocks

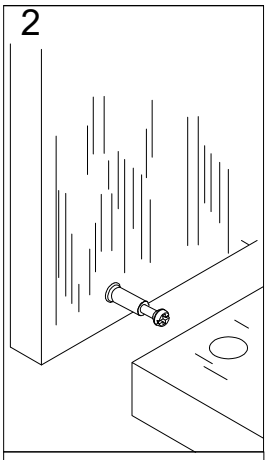
Step 1

Connect the male camlock as diected in the assembly instructions using a scewdriver.



Step 2

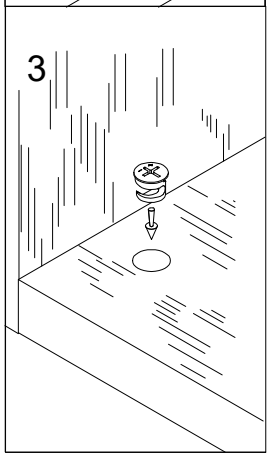
Push the male camlock into the entry hole.



Step 3

Insert the femle camlock as shown in the instruction.

Note：ensure that the arrow on the top of the camlock points towards the entry hole for the male camlock.

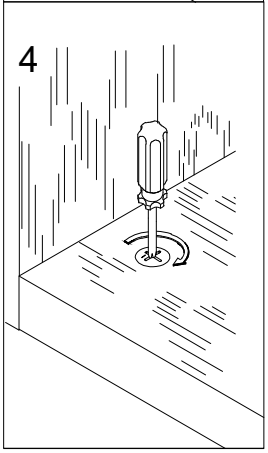


Step 4

Turn the female camlock clockwise with a screwdriver.

You should feel a click when the camlock is locked in place.

The joint is now secure.



Read each step carefully before starting. It is very important that each step of instruction is performed in the correct order. If these steps are not followed in sequence, assembly difficulties will occur.
